

**IMRECKE**  
CONSULTING

## IT Business Analyst/Systems – Cruise Segment (m/f/d) International Cruiseship Management Company, Hamburg

Our client is a **leading global maritime service provider**, specializing in the outsourced **technical management** of high value maritime assets and the provision of a wide-range of supporting technical, workforce and commercial services for **cruise vessels**. They are looking for **ambitious people** with an **international mindset**, who have the **energy and determination** to **take initiative** and to drive their **cruise activities** forward .  
To strengthen the team in **Hamburg** we are seeking a **German and English** speaking **IT specialist** who matches the following profile:

### Your responsibilities

- Analysing business requirements and workflows and document specifications for improvement;
- Improve systems by designing modifications required by the business;
- Engage in client related IT projects, and continuously liaise with Group IT and other IT-related entities, also onboard, in order to identify needs and opportunities for the Cruise division;
- Work in close relationship with the management in defining the respective project scopes, budget, and roadmaps;
- Define project requirements and elements; form project teams; establish project budget proposals to the management with 3rd parties;
- Track and communicate project progress and actively recommend actions for resolving problems;
- Prepare technical reports by collecting, analysing, and summarizing information and trends where applicable;
- Recommend controls by identifying problems, improve IT procedures, maintain system documentation;
- Maintaining and coordinating support activities within the company and with 3rd party entities, liaise with the training department on content creation;
- Facilitate knowledge sharing to ensure continuously learning and upskilling;

- Travel, ideally also to work for other group companies abroad on a project basis
- The IT Business Analyst/Systems reports to the Top management as well as to the Group Head of IT.

### Your profile

- Bachelor's degree in relevant field or equivalent degree;
- Minimum two (2) years relevant work experience in relevant field (IT/Project Management), ideally in an international maritime/ ship management environment;
- Experience in managing international projects within clients and in-house companies as well as 3rd parties;
- Interested in learning new skills and technologies in a challenging international IT environment;
- Experience in complex IT architectures and concepts like O365, ERP, BI;
- Basic software development lifecycle knowledge, skills in software requirements and in analysing information;
- Good analysing and consultancy skills;
- Strong project management skills;
- Good communication and team working skills;
- Fluent in German and English language.

### Our client offers

- A diverse and challenging work in an emerging company within the Cruise industry
- An interesting role with a high level of independency and responsibility
- A professional, friendly and highly motivated international team
- A lean organization with quick decision-making processes
- Working in the thriving city of Hamburg
