## Vessel Performance Manager

Are you a **Naval Architect** or a **Marine Engineer** and passionate about emission reduction, EEXI, EEOI, CII, innovation and Performance optimization?

We are seeking experts to fulfill the role as **Vessel Performance Manager (m/f/d)** with a leading Ship Management Company in Hamburg

Our client is a dedicated ship manager with approximately 110 vessels in service. The company provides superior flexible and customised services in the container, MPP, bulk and tanker segment. Around 4,300 employees, working both ashore and at sea, are committed to provide an efficient, save, environmentally friendly and reliable performance for the benefits of their business partners.

To strengthen the Vessel Performance Team, we are seeking technical experts with a career history matching the following profile:

### Your responsibilities

- Cooperate with vessel command, technical superintendents, Fleet managers and external partners to continuously monitor, evaluate and strategize the fuel consumption optimization and decarbonization plan of the company.
- Monitor & analyze incoming performance data from vessels.
- Close cooperation with vessels command to enhance reporting quality
- Training of crews and office employees for performance and sustainability topics (EEXI, CII, EU regulations – EU MRV, EU Fit for 55, ...)
- Drive innovations and initiate projects within organization towards improving KPI targets
- Analyze hull condition / liaise with operator for hull cleaning.
- EEXI / EEOI / CII calculations / benchmarking of vessels.

### How to apply

Please submit your electronic application together with a CV and supporting documents to Imrecke Consulting GmbH at following email address:

[m.imrecke@imrecke-consulting.de](mailto:m.imrecke@imrecke-consulting.de)

- Prepare & send out regular performance reports & comparisons
- Development / extension of inhouse tools for monitoring of performance and presentation of results to owners
- Investigate performance related issues.

### Your profile

- Marine Engineer or Naval Architect qualification is a must
- Prior experience in a performance management role is a must
- Sound knowledge of performance monitoring & management systems.
- Very good communication skills and can work efficiently with multicultural teams
- Problem solving skills and interest in tackling challenges with innovative solution
- Self-motivated
- Taking initiative
- Fluent in English

### Our client offers

- An interesting and challenging role with a high level of independency and responsibility
- A professional, friendly, multicultural and modern environment
- A lean organization with quick decision-making processes
- A structured onboarding process
- Office location in the center of Hamburg, easy to reach by public transport
